Introducing the New, Enhanced MAYFIELD® 2

Engineered from strong and lighter weight material to facilitate precision, control, and performance. With nearly 50 years of experience and decades of trust, your proven partner in neurosurgical head support will be even more indispensable.

The Transformative History of MAYFIELD®

Dr. Frank H. Mayfield brought the first MAYFIELD® to market in 1967. He worked with his colleagues to revolutionize the way neurosurgical procedures took place, creating cranial stabilization tools that provided critical security and greater patient safety, for better outcomes.

The Legacy Moves Forward

MAYFIELD® 2: With innovations for strength, lightweight handling, and control to help you achieve the precise head position that you need.

INTRODUCING
MAYFIELD® 2
The Neurosurgeon's Choice

NEW! Exclusive Lighter Weight Construction:

Innovative, high-performance PEEK thermoplastic material is made to stand up to the everyday rigors of the operating room. Used in aerospace and automotive products, it reduces the clamp weight and improves handling, allowing you to focus on achieving the best head position. Postprocedure, automatic washing adds a new level of convenience.

Single-Handed, Dual-Button Release:

A simplified release mechanism allows one person to smoothly release the clamp, enabling another team member to focus on safely managing the patient.

Additional Ratcheting Teeth for More Precise Positioning:

51% more ratcheting teeth close the device in finer increments, while reducing, by half, the amount of pressure required to close the device securely.

I-beam Design for Smooth Closure:

Reduces unintentional movement when opening and closing the device, facilitating greater control when positioning or releasing the patient.

Closed-Architecture Locking Knob:

Prevents surgical debris accumulation deep within the mechanism (where it commonly builds up and cannot be reached through traditional cleaning) which may improve the long-term performance of your MAYFIELD® 2 and reduce repairs.

Base Unit Improvements:

Easy-to-use adjustment handles eliminate the need for extra tools. In addition, the powder-coated finish allows for automatic washing of the base unit. (Connector shown here)

Enhance precision, optimize positioning, elevate performance

POSITIONED FOR SUCCESS WITH MAYFIELD® 2

Contact your MAYFIELD® representative to discuss trading in your previously owned MAYFIELD® products to receive credit towards future purchases.

MAYFIELD® 2 ORDERING INFORMATION

Reference	Description
A3059	Skull Clamp
A3101*	Base Unit
A3008	Swivel Adaptor, Tristar
A3018	Swivel Adaptor, Standard

Skull Clamp - A3059

Swivel Adaptor, Tristar - A3008

Base Unit - A3101*

Swivel Adaptor, Standard- A3018

MAYFIELD® 2 products are accompanied by a 2-year extended warranty when used exclusively with MAYFIELD® skull pins.

*The MAYFIELD® 2 Base Unit (A3101) includes one Standard Swivel Adaptor (A3018) at no additional charge. Additional Standard Swivel Adaptors can be ordered, as needed. The MAYFIELD® 2 Tristar Swivel Adaptor (A3008) must be ordered separately.

INDICATION: The MAYFIELD® 2 Skull Clamp is placed on the patient's skull to hold their head and neck securely in position when rigid fixation is desired. The MAYFIELD® 2 Skull Clamp is NOT radiolucent. **CAUTION:** Skull clamp must be applied following the detailed instructions in the package insert. Failure to properly position the skull clamp on the patient's head and to fully secure all adjustment positions of the skull clamp and support device may result in skull pin slippage and patient injury. MAYFIELD® devices have only been validated for use with other MAYFIELD® products. **WARNINGS:** Please refer to the package insert for detailed instructions on use and care of your MAYFIELD® 2 devices.
