

Codman® BACTISEAL® Shunt Catheter

CONFIDENCE.

Purchase any Codman® Valve with a Codman BACTISEAL® Antimicrobial Impregnated Catheter System. If any part of the system requires a revision due to infection or component failure within one year of purchase, **Codman will replace those components free of charge.**

We are so confident in our system that **we are willing to offer you this pledge for one year.** Combine any Codman Valve with a BACTISEAL Catheter to **create a unique and effective barrier to bacterial colonization** on all catheter surfaces - you'll have a winning combination. We hope you never need to use our BACTISEAL Pledge, and judging by our track record, you probably NEVER WILL.

CODMAN VALVE + BACTISEAL = CONFIDENCE

BACTISEAL: Confidence by Design

CREATES a unique, effective barrier to gram positive bacterial colonization on all catheter surfaces

MAINTAINS the critical first month shunt implant vigil with two, slow-release antibiotics

REDUCES the potential for colonization both in the catheter lumen and on its outer surface

Codman® BACTISEAL® EVD Catheter

CONFIDENCE.

Purchase a Codman® BACTISEAL® EVD Antimicrobial Impregnated Catheter with the Integra® AccuDrain® External CSF Drainage System. If any part of the system requires a revision due to infection or component failure, **Codman will replace those components free of charge.**

The Integra AccuDrain External CSF Drainage System, with pinpoint hydrostatic leveling, provides clinicians with an easy-to-use device. Combine it with the BACTISEAL EVD Catheter to **create an effective barrier to gram positive bacterial colonization** on catheter surfaces, and you'll have a winning combination. We hope you never need to use our Bactiseal Pledge, and judging by our track record, you probably NEVER WILL.

BACTISEAL EVD + ACCUDRAIN = CONFIDENCE

BACTISEAL: Confidence by Design

CREATES a unique, effective barrier to gram positive bacterial colonization on all catheter surfaces

REDUCES the potential for colonization both in the catheter lumen and on its outer surface

PROTECTS for up to 28 days with two, slow-release antibiotics
